

Bicycle Modification

Ingenuity video script

Tom Buscher

good8design.com

Genre: Informational documentary

Logline: In need of a more comfortable bike seat, I decided to change the seat to a new one designed to reduce weight and increase comfort.

Act I:

Tom sets up the work area placing the bicycle on a work stand.

Act II:

Tom removes the old bike seat carefully not to remove the seat bolts completely so that he can avoid unnecessary work.

Act III:

Tom puts the new bike seat on with a careful knack that allows the seat rails to fit inside the connector without removing the bolts. He is successful and now enjoys a more comfortable riding experience.
